

# THE WORLD OVER

TO BUILD FOUR RADAR BEACONS

Erection of four 124-foot radio beacon towers to guide trans-Canada Air planes began at Edmonton on Friday following a visit of department of transport wireless experts.

Installation of meteorological and radio equipment at Edmonton airport were discussed by the experts.

## COPY OF B.N.A. ACT SECURED

Pears entertained in some quarters as to there being no British North America Act in Canada, would be eased by the fact that there now exists in the Dominion archives a recently obtained certified photograph of a certified copy of the act as checked by the clerk of the British Parliament with the original voluminous document of the act as approved at London, England, 70 years ago. The B.N.A. Act, of course, is a statute of the British Parliament, setting up Canada as a confederation in 1867 and thus the original act itself could not be released by British parliamentary authorities.

## GOVERNMENT SURPLUS FOR 7-MONTH PERIOD IS \$33,000,000

OTTAWA—The Canadian government had a surplus of \$33,372,000 for the first seven months of this fiscal year, it was reported by Watson Selar, comptroller of the treasury. From April 1 to October 31 receipts totalled \$319,757,177 and disbursements \$286,385,577. At the same date last year Finance Minister Bennett had a deficit of \$64,003,280. The difference this year represents a turnover of \$100,000,000 and increased the government's treasury officials a balanced budget may be reported at the end of the fiscal year next March.

## RECORD LOAD OF WHEAT

Pierre Deshoux of Peadarville delivered a truck-load of wheat containing 293 bushels of wheat to the Alberta Pool Elevator at that point, and J.E. Comeau, Pool agent, claims this to be a record for Western Canada. The wheat graded Two Garretts with one per cent dockage. In the pioneer days in the province wheat was delivered in wagons and 65 bushels was considered a good load. With the introduction of the auto truck, loads contained increased until the average has reached around 200 bushels. Mr. Deshoux's load of 293 bushels of wheat, or around 8-3-4 tons certainly, marks a record.

## WINTER ROADWAY INTO NORTH

EDMONTON—The first winter roadway in the northward, to the mining areas, from Fort McMurray to Lake Athabasca will be built under a provincial government franchise issued to J.J. Doyle of this city. It was announced by authority of Hon. W.A. Fallow, Minister of Public Works.

The minister announced that the franchise had been granted on the understanding that contractors would commence immediately and the highway was to be completed in sufficient time to enable transportation of several thousand tons of freight before the spring break-up.

The roadway will be cut through bush and will use the frozen winter highways wherever they can be used.

By means of this road the communications with the mining areas will be greatly facilitated.

## ANNUAL MEETING OF THE GRAND FORKS ATHLETIC ASS'N

Officers Elected for 1938 to Take Office Immediately

The annual meeting of the Grand Forks Athletic Association was held at the Garrett school on Monday evening of last week.

The year's business was reviewed and found to be very satisfactory. There is a bank balance on hand of approximately \$70, a sufficient surplus material is on hand to last about half of next season.

The league between softball teams from Hesketh, Carbon and Grand Forks gave the following points to the various teams: Grand Forks, 16; Carbon 8, and Hesketh 4. Carbon and Hesketh each owed Grand Forks two games at the G.F. diamond.

It was decided at the meeting to run the skating rink under a separate committee, as follows: John Wood, Elwood Kane, George King, C. Cave and R. Garrett. Those names were elected for 1938:

President, T. King Jr.  
Vice-President, John Hart.  
Sec.-Treas., Chas. Patterson.  
Committee, Tom White and Ross Dunlop.

President Tom King offered to take office at once and the resignation of R. Garrett, C. Cave and M.J. Garrett.

## FOR THE FALLEN

With proud Thanksgiving a mother for her children, English mourns for her dead across the sea, Polish or the flesh they were, spirit of her spirit, Fallen in the cause of the free.

Solemn the drums thrill, Death agonist and royal Sings sorrow up into immortal spheres, There is music in the midst of desolation And a glory that shines upon our tears.

They went with songs to the battle, they were young, Straight of limb, true of eye, steady and aglow, They were staunch to the end against odds uncounted; It was all they believed in, and that was enough.

They shall not grow old, as we that are left grow old; Age shall not weary them, nor the years condemn; At the going down of the sun, and in the morning, They will remember them.

They mingle not with their laughing comrades again; They sit no more with familiar faces of home; They have no lot in our labour of the day-time, They sleep beyond England's foam.

But where our desires are and our hopes profound, Just as a wellspring that is hidden from sight, To the innermost heart of their own land they are known As the stars are known to the Night;

As the stars that shall be bright when we are dust, As the stars that are far away in the time of our darkness, To the end, to the end, they remain.

—Laurence Binyon.

## TRANSFORMING FRIENDSHIP (By Rev. W.H. McDonald)

At the center of each life is a little nucleus of ideas concerning what that person really trusts and believes in. We prove our real beliefs day by day, not on special occasions. Life is like a river moving in a winding, twisting fashion, but steadily in a certain direction. At times the current is swift and at other times almost slow—but it is moving.

It is a question then fair to raise, Is it not a question of God here? A man really and truly thinks about God is a very important thing in that man's life. Some ideas of God have rightly been displaced by our best thinkers. He is not a war-God, Hever-over thinks that damns children and babies? Can anyone think that he provides special moral laws for favorites?

To me life is unity, and truth is also. Physical truths do not in a real analysis contradict spiritual truths. There are no breaks in the story of life from the "cell" up through plant life via animal instincts to the mind of man. God giving out from himself in a marvelous expressiveness in various levels of our natural world until near the top, man in his own image. One, the Sin of Man, has revealed the real meaning of our lives. Most of us remain immature, childish, mentally stunted and lazy. What so many refuse to realize is that the spiritual laws of life are even more real than the physical laws. Just this! After the discovery of physical laws, we have made a marvelous machine, it is become a destroyer and a blessed means of discovery. The knowledge of laws and forces operating in my spirit.

In all it is moral and not intellectual difficulties that prevent us from trusting God. In short we want our own way. We shut out thereby the silent ministries, physical and spiritual, which are seeking to enter from God and bless and strengthen our lives. God is a living spirit and he finds expression in all the levels of life. He finds his richest expression in lives that are like unto Christ's. He is hindered by those who contradict Christ.

Said a young university student, "I have hundreds of new ideas; what I want now is the courage to put them into operation in my life." That is just it. If we believe in God and that he is like Jesus Christ, we must practice trusting God in Jesus day by day. As we like the disciple in Jesus day who as they followed "began to be afraid." I think that is our chief difficulty today. Afraid!

God has intended men to be the channel by which the spiritual power

When Alberta denied a made-in-Alberta product they can rest assured that so far as Alberta butter is concerned, they will receive a commodity which has taken premier honors in open competition at exhibitions all over the Dominion. A total of 907 prizes, awarded to Alberta butter at the nine largest exhibitions in Canada represents 50.2 per cent of the total awards. No other province approached the Alberta record, and although three of the largest shows were held in Ontario, it is interesting to note that Alberta's chief competitor was the province of Manitoba, with 700 awards.

## FARM NEWS LETTER

Soils Analyzed by New Method

The complete chemical analysis of a soil is a tedious and costly operation and seldom yields data on which fertilizer needs can be based with any degree of accuracy. True, the total amounts of plant food substances present can be determined with precision but the proportion of those available for extraction by the growing crop cannot be estimated very closely. Consequently the saying arose that the only way to gauge the fertilizer needs of a given soil was to try the fertilizers in the field and note the crop response. A short cut is represented by what is known as the Neilsen method in which eye plants are grown on the soil under test, removed while still in the seedling stage or 17 days after planting, dried in the oven and analyzed. The amounts of the plant food substances found in the dry matter indicate a measure of the deficiency, abundance or excess of the available supply of these in the soil.

## Knowledge of the Soil

The farmer's ability to judge his crop needs was conceded by Thomas Carlyle, a century ago, when he said: "The simple husbandman can tell his field and, by knowledge gained of its soil, plant it with the fit grain, though the deep rocks and central firms are unknown to him. His little crop hangs under and over the ornament of stars and sails through whole untraded celestial spaces, between Arctus and Libra; nevertheless it ripens for him in the time, and he gathers it safe into his barn." In Carlyle's day the only fertilizer known was barnyard manure, and soils were just beginning to show symptoms of phosphate deficiency. Since then the general use of commercial fertilizers has become established in the United Kingdom; in Canada the need is now widely recognized and the farmer is seeking expert advice on the subject.

And insight helps us along on the physical means of life to transform and direct their use into just, right and merciful ministries.

## Y.P.S. ELECTS OFFICERS

A re-organization meeting of the Young Peoples' Society of the United Church was held on Tuesday, November 2nd, and the following officers were elected:

President, Nellie Hay.  
Vice-President, C. Gordon.  
Sec.-Treas., Cyril Poon.  
Executive, Alma Pufferath and Johnson Hart.

It was decided to meet the first Tuesday evening of each month. The various committees are now at work outlining the winter's program of entertainment and on Tuesday, November 16th a hike will take place.

## WEEKLY COMMENT ON THE WORLD OF WHEAT BY H. G. L. STRANGE

"Can Thatcher, the new rust-resistant wheat, be used as an early variety to replace Garret?"

Many farmers in Northern Alberta and Saskatchewan are asking that question; knowing, of course, that Thatcher is eligible to go into Grades No. 1 and No. 2 Northern, from which Garret is excluded.

The results of thousands of tests made by hundreds of "Crop Testing" Elevator Agents, in co-operation with many farmers and with Governmental Institutions, reveal definitely that Thatcher not only is the highest yielder of all spring wheats, but that in addition it is about three days earlier than Marquis.

Because of this earliness, Thatcher certainly will escape damage from some late fall frosts which might harm Marquis. Garret, however, being ten days earlier than Thatcher, is still seven days earlier than Marquis.

I therefore strongly advise farmers who have decided to replace Garret with Thatcher, to treat their Thatcher seed against smut and root rot diseases with a mercurial dust—either Crescon or Lysol—and particularly to use fertilizer, either ammonium phosphate or triple superphosphate. Thatcher will cause Thatcher to mature at least a week earlier than Marquis, making it about as early as Red Ball, and about a week or more than two or three days later than Garret.

Following factors have tended to raise wheat price:

First in Argentina. Unsatisfactory condition parts of U.S. winter wheat belt. Much Russian wheat of inferior quality. U.S. may again raise gold price. Wet weather interferes with Italy and Spain. Dry weather hampers South African corn growth.

Following factors have tended to lower price:

Rainy makes large wheat shipments. Argentine acreage estimates of wheat, oats, flax and rye show a decrease. Argentine grain acreage increased slightly. Harvesting commences in Australia. Expect resumption Romanian wheat exports. International Institute indicate 132 million wheat surplus.

## ADDITIONAL AREAS OPENED FOR ELK HUNTING

An order-in-council has been passed recently providing for the opening of certain adjacent areas to the Pembina-Breux Elks Reserve, for the hunting of Elk, as follows:

"Commencing at the point where the Pembina River crosses the western boundary of Township 49, Range 8, West of the Fifth Meridian; thence down the stream along said river to its point of intersection with the Northern boundary of Township 52, Range 7, West of the fifth Meridian; thence westerly along the northern boundary of said township line to its point of intersection with the C.N.R., on the northern boundary of Section 31, Township 52, Range 18, West of the Fifth Meridian; thence in a southerly direction following the sinuosities of the C.N.R. and Cross Branch to the point of intersection with the Pembina River at or near Lovett; thence westerly along the northern boundary of said township line to its point of intersection with the western boundary of Township 46, Range 19, West of the Fifth Meridian; thence in an easterly direction along the northern boundary of said Pembina-Breux Reserve to the point of commencement."

## Irrigation And Immigration

Two major questions of public policy are at the present time engaging a good deal of attention in Western Canada, frequent reference being made to them at meetings of organizations and in the news and editorial columns of the daily press. They are the problems of irrigation and immigration.

On the face of it, it may appear that these two questions have little or nothing in common with one another but a little reflection shows that they are, or ought to be, closely related when either subject is brought up for discussion and consideration.

Their relationship becomes apparent when it is remembered that the economic fate of the farmer of the present day in the West and that of the future settler is dependent upon the presence or absence of sufficient moisture to ensure the growth of field crops and the maturity of livestock, and when consideration is given to the probability, nay almost the certainty, that the West will again sometime in the future be subjected the ravages of drought.

Much of the present day opposition to immigration would vanish into thin air if there were some assurance that the next visitation of drought conditions would witness a supply of irrigable water in storage for the maximum acreage that could be served from this source in such an eventuality.

History, as demonstrated by geological data and revealed in the growth of trees over the past 200 or 300 years, has shown that the prairies for centuries have been subject to recurrent periods of drought of varying intensity and duration and there is no reason to believe that in this respect history will not repeat itself in the future. In fact, meteorological and other authorities appear to be in unanimous agreement on this point and recently one expert was quoted as stating that the West will always be subject to drought periods.

This being brought for granted it appears to be a rational suggestion that advantage should be taken of the experiences of the past eight years to provide, as soon as possible, for the storage of available waste water to the maximum extent of engineering feasibility.

To some extent this is being done under the Prairie Farm Rehabilitation Act, but where the programs being carried out or mapped out for future undertaking meet the desideratum of maximum engineering possibility is debatable.

It is true that it would be folly to attempt to carry out projects which are beyond the realm of engineering feasibility, but there are some authorities who contend that some schemes which come within this scope should not be undertaken because they are not economically sound, in other words they would be no so expensive that they could not possibly be self supporting. Cr just costs could not support the overhead, is the contention.

It is just those projects, those which are feasible from the engineer's viewpoint but regarded in some quarters as economically unsound which might well be subjected to the planning and survey in the hope that some measure might be devised to relieve them, if constructed, of some portion of the overhead which seems to be the stumbling block.

If, for example, these projects in the doubtful economic category could be utilized as a form of public works program, financed substantially by grants in aid from the Dominion treasury, at least to the extent to which such is now being donated for the maintenance of the same number of men who are idle, can it be doubted that some of these undertakings might be relieved of sufficient carrying charges to bring them within the scope of economically feasible undertakings as well as engineering possibilities?

It has been argued that the Dominion government has no legal authority under the British North America Act to carry out public works except through grants to the provinces, but assistance presumably can be legally given in that form and, if so, why not?

The point is that large sums of money are now being expended from the Federal treasury to sustain thousands of idlers without giving them an opportunity to contribute a quid pro quo. If some of this money could be utilized to provide work for a substantial number on projects which would be of permanent benefit to the principal industry of the West, agriculture, it would serve the double purpose of maintaining the morale of large numbers and possibly of making economically feasible some projects which are now in the doubtful class by relieving them of a portion of the carrying charges. At any rate, the idea is worthy of further investigation on the part of the authorities.

While immigration as a topic has been more or less shelved during the summer months and particularly after it became apparent that the West as a unit was to sustain this year a disaster of the greatest magnitude there are indications that efforts are being made to actively promote settlement schemes in the immediate future. Brigadier-General Horsey was recently quoted as stating that the time for talk has passed and action must be taken and Commissioner Lamb of the Salvation Army is touring the West, presumably particularly interested in the question of migration from the British Isles.

To the average individual farmer and farmer organizations any proposal to push immigration schemes at this time appears to be unpropitious, but to the extent to which crop yields can be assured in future through irrigation and conservation projects, to that extent at least, opposition to plans to bring more people into the country to engage in agricultural pursuits would diminish.

A cattle crew found its way from Indiana to Oregon, a distance of about 2,200 miles. It was driven by irrigation in 140 days the year will weigh more than 2,200,000 pounds.

## Royal Ulster Rifles

Battles During Last 150 Years

The Royal Ulster Rifles, raised in 1793, carries on its colors the battle honors of most of the major battles in which British troops have been engaged in the last 150 years.

Its allied regiment in the Canadian militia is the Lorne Rifles, of Georgetown, Ont.

The Ulsters were composed of the old 83rd and 86th foot. The 83rd was raised in Dublin for service in the West Indies, the latter was a Shropshire regiment, being first known as the Shropshire Volunteers.

When the present system was adopted, the two were combined as the Royal Irish Rifles.

Following the treaty with the Free State in 1922, five famous Irish regiments disappeared from British army lists. The Royal Irish, however, were retained, their name being changed to the Royal Ulster Rifles and a re-creating area in Northern Ireland being allotted to them.

The regiment fought under the Duke of Wellington throughout the Peninsular War of 1808-14, and was represented at all the big battles of the famous campaign, including Talavera, Buena Vista, Salamanca, Oporto, Ciudad Rodrigo, Badajoz, Salamanca, Vittoria, Nivelle, Othello and Toulouse.

Both battalions served in India during the mutiny of 1857, and the colors carry "Central India" to commemorate the regiment's service in the Boer War the Second Battalion served throughout the campaign.

During the Great War saw the Ulsters in action at the Battle of Mons in 1914, and thereafter they were in every major engagement in France and Flanders until 1918.

Other battalions were at the Battle of Gallipoli and at the Battle of Sari Bair, later serving in the Palestine campaign and taking part in the several battles of Gaza and the capture of Jerusalem.

## Air Line Pilots

Will Wear Uniform Of Navy Blue And Of Navy Cut

Style notes for Trans-Canada Air Line pilots have been issued. The well-dressed pilot will wear a uniform of navy blue and of navy cut—and he will look much like an officer of the royal navy.

A pattern uniform, soon to be sent to the operating department at Winnipeg for suggestions as to details, consists of a double-breasted "monkey jacket" and trousers known as "slacks".

An immediate crease, too, will grace them.

Caps, it was announced, will not be worn in the planes, but the hope is that small toques to wear in cold weather. Band badges may not yet have been decided upon.

Insignia of the line, formally approved by directors, consists of a maple leaf within a circle 20 inches in diameter. The circle is surrounded by blue. Imposed on the leaf, which is in autumn colors, is a conventionalized bird in flight, somewhat similar to Imperial Airways' device—and the gold letters T.C.A.

The design will be placed on port and starboard sides of the plane's nose forward of the pilot's cab.

## "Canada 1937"

This Season's Broadcasts Bringing A New Experience To Canadian Listeners

The radio series "Canada 1937" which secured such success last season started again last week. This time, most spectators of Canadian broadcasts will be heard Friday evenings at 10 p.m. E.S.T.

Outstanding commentators under the guidance of Vernon B. Lewis will again speak from Europe—an interview in Canada probing for answers to his questions of the "man in the street".

Mr. J. H. Shippin, Canadian correspondent in New York, will speak of the N.E.R.C. station, playing the latest happenings of the Gay White House as are of interest to Canadian listeners.

A new technique will be introduced in the talks on Canada to make the very pulse of the nation audible to listeners throughout the country. Mr. Walter Brown will broadcast from the various localities each week, telling of that district's contribution to Canadian life and the "man in the nation" builders who make that progress possible.

Yet another outstanding feature of the program will be the music—over 100 selections will be specially arranged for the large orchestra and choir that is being used.

In sponsoring these broadcasts—by the Canadian Tobacco Company, George Imperial Tobacco Company of Canada Limited, is bringing a new experience to Canadian listeners. These Friday evening programs are a live demonstration of the fact that Canadian broadcasting is equal to the challenge for something new and spectacular.

## Had No Giant Boats

But Scafering Men Were Fearless In The Old Days

The London correspondent of the Ottawa Journal says: There has been a happy ending to the sea drama of Endeavour I. Having parted her tow-ship in an Atlantic storm, and not been seen or heard of for some days, Endeavour I was made a stunt presence. Her tumultuous welcome amazed her sturdy skipper and crew.

But how strangely our views about ships and the sea have changed. To-day we are appalled by the thought of a 100-ton yacht crossing the Atlantic, and maybe American yachtsmen will now modify their own cup conditions. But this view is due purely to our modern obsession with great 60,000-ton liners. The Queen Mary warps our historical perspectives.

Drake's galleon, afterwards rechristened Golden Hind, in which nearly four centuries ago he circumnavigated the globe and was exactly the same tonnage as Endeavour I. Most of his accompanying ships were even smaller. The Elizabeth was only 60 tons. There it was the men who were giants. Now it is the ships.

## ALICE STEVENS' RECIPES

HOME MADE CANDY MAKES POPULAR CHRISTMAS GIFTS

Christmas is almost here and gifts are hard and you are finding it difficult to do much Christmas shopping. Why not plan to make a number of your gifts in your own kitchen?

Many of us have allowed his own selfishness to commercialize your Christmas. The spirit of the first Christmas. The giving brought back the gift more than the gift itself is what counts most. This year the gifts should be inexpensive and practical, rather than expensive and useless. This latter type are usually wrapped away and forgotten.

Why not visit your cellar shelves and take down a few jars of your own making? Candy is a very lovely gift. When making your own candy, make a little extra and some of your friends will be very happy to receive a jar.

A box of homemade candy is very much enjoyed by every member of the family. In many cases, the pre-made candy is better than the home-made. On the farm you have your own milk, cream and butter. These are some of the most expensive ingredients of the candy.

The temperature is the most important parts of candy making. While a thermometer is not accurate, a little practice means that the water will be at the right temperature. The cold water will be the kind of ball that a few drops of the candy will make in cold water. Puffs and malleable cream should be boiled to the right stage, while buttercream and taffies should be cooked to the right stage.

The humidity of the atmosphere is also important. It is harder to make good candy on a dull, cloudy day than on a bright, clear day. Boil the candy a little longer on a dull day. Have as little steam as possible in the kitchen. See that the kettle is not boiling.

Candy is very apt to be grainy. This can be avoided by adding a little corn syrup, vinegar or cream of tartar. There is a chemical change takes place in the sugar and the addition of one of these hastens the change. If the sugar does not make this change, the candy is sure to be grainy.

Do not stir the candy while boiling. The sugar should be dissolved before the candy starts to boil. Stir the sugar until it is dissolved. If crystals form, add a little water of the pan during the boiling. We then stir with a small wire cloth tied to a fork. If the candy is covered with the dust, stop boiling, these crystals are melted by the steam and there is less danger of the candy becoming grainy.

If the candy is to be beaten, as in fudge and malleable cream, allow the candy to cool before starting to beat. Cook the candy until you can hold the pan comfortably on your hand. Do not stir the candy suddenly by setting the pan in cold water.

## FINOCH

2 cups lard  
1 tablespoon butter  
1 cup sugar  
1 teaspoon flavoring

Melt the butter. Add sugar and milk. Stir until mixture starts to boil. Boil without stirring until the mixture forms a soft ball when dropped in cold water. (This will take about 12 minutes.) Cool and beat. Nuts and fruit may be added if desired.

Readers are invited to write to Alice Stevens Home Store for free advice on home cooking and household problems. Address letters to: Winnipeg Newspaper Union, 175 St. Bonaventura Ave., Winnipeg, Man. 2228

## A Chinese Bomber

This Is A Story Of Nerve And Hazardous Daring

The tale of the Chinese bomber deserves to pass down in history. How at dusk when the Japanese bombers were returning home, he joined the four planes and travelled along with them, his Chinese machine getting no attention in the night. He switched on his lights when they switched theirs and circled the airfield along with them.

One by one the Japanese bombers landed, and when the four of them were downed up along with three others which were on the ground, down swooped the Chinese airmen to within 500 feet and plants two bombs among them and seven perfectly good Japanese bombing planes were gone to the place where all good, or bad, bombing planes go.

Then this neat little bit of work thoroughly done, off droned the Chinese airmen to his own lines. A story of nerve, initiative and hazardous daring, which deserves to live—Halifax Chronicle.

## Farm Tires Show Big Increase

Nearly All Tractors Now Equipped With Rubber Tires

Attended by 115,000 farmers, over 70 tractors competed in the field at one time during the International Plowing Match held at Fergus, Ontario, from October 12 to 15. Only six tractors were on steel-tugged wheels while the remainder being rubber-tired, which reflects the tremendous growth of pneumatic tires for tractors since they were introduced at the Ottawa Match in 1920. Outstanding in performance were the tractors on Firestone Ground Grip Tires, as they won eight out of nine of the first awards, including the grand championship, captured by Fred Timbers, of Kingswood, Ontario, for the third consecutive time.

## Called A Perfect Crime

Collection Of 70,000 Banknotes Disappears From Owner's Home London's perfect crime—the theft of the \$20,000 Avonmore collection of banknotes, untraceable in the open market—has just been discovered.

The collection of 70,000 notes, in 110 leather-bound books, vanished from the home of Frederick Ernest Hasting. They were waiting to show how the thieves entered the house. There were no fingerprints, no marks on any window, and no one heard a sound.

The steel, unbreakable safe, six feet high and four feet broad, had been neatly forced open. It had an ordinary patent lock.

## WHAT HO!

— By —  
RICHARD CONNELL  
By Arrangement With Thomas  
Allen, Publisher, Toronto.  
CHAPTER I.—Continued

He had adopted "Noblesse Oblige" as his own private motto; but being a big game and living up to it, were not always easy in Bear Falls. There were times, and this was one of them, when he felt an exigent desire to ally forth with a baseball bat, in lieu of a battle-axe, and play requiems on the skulls of his tormentors, beginning with the large, polished skull of Otis G. Wyncoop.

However, the Wyncoopian skull, and the other skulls went unsmashed that night, for Ernest counted ten, and decided to expend his steam on the less sanguine project of arranging his exhibit of birds and beasts for the state fair.

On this labor of love he had toiled, intermittently, for some four years. In natural settings and realistic poses, he had arranged family groups of porcupines, crickets, quail, sparrows, muskrats, chipmunks, coons, coyotes, rabbits, gophers, wild cats, hawks, crows, badgers, cat-birds, Kingfishers, owls, swallows, otters, and other feathered and furry denizens of Iowa. Mr. Slocum, dropping in now and then from his business, had pointed out that the commercial value of this undertaking was highly doubtful, since Mr. Slocum put it, the number of folks in Iowa with a craving for a household of varmints could be counted on the thumb of an old Northwest. Ernest worked on. He finished the final feather on the last snipe the day before the fair opened.

## CHAPTER II.

As Ernest was the sort of man who gets crowded into corners, and who in restaurants is always given a seat which commands a view of the kitchen, he found himself, and his exhibit, tucked away in an obscure corner of the exhibition hall, almost completely hidden from view by the Grand Central Garage's display of elephantine pumpkins and mandarinade cheeses.

However, a fellow-townsmen had fared better when the spaces were allotted. Mr. Otis G. Wyncoop, with masterful boldness had demanded and received the most conspicuous spot in the centre of the great hall. Here his corps of workmen had set up the exhibit of Wyncoop's Wonder Weenies, conceived and designed by Mr. Wyncoop, personally.

"I intend to give it," stated Mr. Wyncoop, while in the throes of creation, "a touch of whimsy."

"Ode," said her husband, "and don't forget to feature the product. I'm selling sausages, not whinnies." "I am aware of that," said Mr. Wyncoop. "The sausages will not be slighted, I assure you. Now, may I have carte blanche?"

"If you need her, get her," assented Mr. Wyncoop. "Class is what I'm after. I'm a class creature."

"Class you will be," promised his wife, "but class costs."

"Spurge away," directed Mr. Wyncoop. "I won't kick at the bills if we win the prize. The bill will be worth thousands to me. Why, say, I could tie a little blue ribbon around each individual weenie and jack up the price."

So Mrs. Wyncoop's fancies took concrete form, and the result was a floral garland, festooned with a profusion of roses each with a tiny electric light in its artificial bosom. In this colorful bower stood the good horse Tartar, caparisoned now with a saddle and bridle of snow-white leather embellished with rhinestones. Enthroned on Tartar sat a shapely young lady whose somewhat sketchy costume of gauze was supplemented by a cascade of blonde hair which rippled to her waist. She smiled alluringly at the crowd and cheered when Mrs. Wyncoop was not watching. Mr. Wyncoop assumed that her name was Blanche, and thus, to her surprise, addressed her. Just who this nymph was supposed to be was a moot point among those who thronged around the spectacle. Some opined she was Lady Gladys, others maintained she was Joan of Arc, and others held that she was either the Spirit of the Middle West, or Miss Bear Falls. She carried a silken banner which bore the device, "We should on purp. 'The Weenie That Won The West.'" Last there was one lingering doubt as to which weenie merited that distinction, above the whole exhibit, a vast sign flashed forth, first in pink, then in amber lights, the word "Wyncoop."

To her promise, Mrs. Wyncoop had not neglected the less fanciful and more educational side of sausage making. Beside the tiny grove was a tiled compartment which bore the antiseptic air of an operating room. Here eight pretty girls in

white uniforms which made them look like a squad of lady husars, tended a large machine of gleaming nickel. From its maw, at intervals, emerged the tid-bit that had made Mr. Wyncoop rich and famous. As the new-born weenies came out of the everywhere into the here, they were promptly collared by an efficient young husar and popped onto an electric grill. There they sizzled until another husar, armed with toothpicks, impaled them and presented them to passersby, and, since they were free, the passersby were numerous.

About this exhibit proudly hovered Mr. Wyncoop, who in face and figure looked like a large-scale caricature of one of his own products. However the report that a near-sighted agriculturist from Coon Rapids had attempted to put mustard on Mr. Wyncoop's nose may be set down as a canard started by a jealous competitor. Mr. Wyncoop could be distinguished from his creations by the fact that he wore a tweed suit and had a bass voice.

With him, her slightly belated brow ready for the laurel wreath, was his wife, Armina, who wore, among other things, her Chicago shoes and her milk coat. The day was mild to the point of downright balminess, but Mrs. Wyncoop wore this fur mark of caste almost as constantly as its original owners. The weather and the wrap conspired to make Mrs. Wyncoop's presence, but she stuck to her coat, and vice versa, a martyr to a good cause. One of the three judges who would presently pass the exhibits was no less a personage than Mrs. Clara Martha Phelps, active president of three clubs, and president and founder of two others, and a member of a score more, to whom, socially, Mrs. Wyncoop was an as-shall to an alp. In her mansion in Des Moines, Mrs. Phelps conducted a celebrated salon at which worthy causes were expounded, and yoga expounded their esoteric philosophy, and papers were read on the Lake Erie, Buck and Biology. To sit in this select circle and inhale hurgins of culture was Mrs. Wyncoop's most ardent ambition. So he wore her milk coat, as a badge and a symbol. Mrs. Phelps had one, and Mrs. Wyncoop cherished the hope that Mrs. Phelps would agree that Mrs. Phelps were sisters under the skin.

Pricking in the shadow of his parents was the son and heir, Master Mervin Wyncoop, in the electric blue and cerise uniform of a brigadier general in the Bear Falls Military Academy, "a ho-school for manly boys." Master Mervin, looking like a junior weenie, was tucked away in a feather-duster, bought for that express purpose, and was planning to ruffle the composure of the young lady on the horse as soon as a suitable opportunity presented itself.

To keep in training for this enterprise, Master Mervin, every minute or so, snatched with nimble, chubby hands one of the sausages spitting on the grill, and balled it, displaying a pelican-like capacity astonishing in one of his tender years. The many bright brass buttons on his uniform tugged at his moorings, and he began to budge, visibly, in all directions. Still he continued to stroke himself in his saucers, while Wyncoop senior beamed his approval. Just as the roomy tent was to be taken down, and all the known laws of physics, or explode, the committee of judges, in solemn procession, approached the Wyncoop exhibit.

Mrs. Clara-Martha Phelps, as befitted her rank, came first, followed by a son Congressman and a fat Mayor. Mrs. Phelps was a giraffe-shaped lady, two ladies tall, and one lady wide.

## (To Be Continued)

## Mental Cases

Number of Alberta Patients Not Out of Line With Normal

Rate of increase in the number of patients in Alberta institutions is not "out of line" with the normal rate across Canada, a provincial health department official said at Edmonton.

Commenting on the statement of Capt. Cecil Bell (Lib. South Okanagan) in the British Columbia legislature at Victoria that people were being taken at the rate of three a week to asylums from the Alberta hospital, he stated:

"We have not segregated the patients and therefore cannot say what numbers are being received from particular districts."

"At the Ponoka institution we admit an average of 600 patients a year and let out about 450, leaving the increase at approximately 150, which is about the average rate for Canada."

The name "Lin case" is derived from the term, Lin cameras, by which they were known in England during the latter part of the 19th century.

**THIS AIR CELL NEVER NEEDS RE-CHARGING**

**RIGHT, AND IT'S GUARANTEED 1000 HOURS**

**Guarantees**

That the "Eveready" "Air Cell" A Battery, No. A-600, when properly applied as an approved "Air Cell" Radio Set, and maintained according to directions provided with each battery, will supply "A" power for a minimum of 1,000 hours, no matter whether the Radio Set is used for ten or twenty-five hours each day.

CANADIAN NATIONAL CARBON COMPANY, LIMITED

## Insist on AIR CELL

### THE GUARANTEED RADIO "A" BATTERY

● Thanks to modern science, the old nuisance of recharging "A" batteries has been ended forever. Eveready AIR CELL, the best source of "A" power for radio sets, never needs to be recharged. It renews its power from the air, day in and day out.

Install an Eveready Air Cell in your radio—and forget about "A" power for 1,000 playing hours! All you need to do is to add a little ordinary water every few months. Think of the trouble you save yourself—to say nothing of the money!

Remember this, too, about Air Cell. It maintains its full power to the end. No periods of fading power which spoil reception.

Eveready Air Cell is not an experiment. It has proved its worth for seven years—in every type of Air Cell receiver.

Don't waste money on fads and experiments which you hope will work! You can count on Air Cell—it's guaranteed for a minimum of 1,000 playing hours!

## Bandit Is Killed

## Action Well Advised

## Little Helps For This Week

Be of good courage and He shall strengthen your heart, all ye that hope in the Lord. Psalm 31:24.

In heavenly help asking:  
"Ode," said her husband, "and don't forget to feature the product. I'm selling sausages, not whinnies."

A true Christian that has power over his own will may live nobly and happily and enjoy a clear heaven within the severity of his own mind perpetually. When the sea of his life is most rough and tempestuous and about him, then can he safely smile from month to month upon the waves.

He who has the mastery over his own will feels no violence from without, finds no content in what; and when God calls him out of this world he finds himself the power to lay down his own life, neither is it so much taken from him as it is quietly and freely surrendered up by him to God who gave it.

They were unpacking their goods for a week-end's camping.

"George," thanked the massive wife as she came upon an unopened bottle of whisky, "what's the meaning of this?"

"That's all right, my dear. I brought it along to stick a candle in when it's empty."

Apples growing on neighboring trees were baked by the intense heat of the flames during the night at Durlay, South Hants, England, in 1950.

Blissed are the nobodies, the clameuses that befall great nations are brought about only by great men.

## Christmas

The following steamers have been scheduled for your convenience to enable you to spend a happy Christmas among your loved ones in the Homeland.

From MONTREAL

Nov. 25 "AURANIA" to Plymouth.

Conductor, Mr. J. J. Carson.

## Plan Splendid Hunting Season

Prospects for big-game hunting  
are annually bright in Canada  
this fall. Reports covering the  
thousands of square miles of  
wilderness accessible by Canadian  
Pacific feature a plentiful  
of game and excellent conditions  
for hunting. Outfitters and guides  
across the country also report  
more reservations for hunting  
parties, both from Canada and  
the United States, than they have  
had for years.

Wild sections of Canada lying  
practically in the back yard of  
civilization have a wide variety of  
big game in addition to many  
types of game birds and smaller  
animals. Nova Scotia has moose,  
deer and black bear; New Brun-  
swick, deer and black bear; Que-  
bec, moose, caribou, deer and black  
bear; Ontario, moose, deer and  
black bear; Manitoba and Sas-  
atchewan, moose, deer and car-  
ibou; Alberta and British Colum-  
bia, mountain sheep and moose.

caribou, moose, elk (wapiti), deer,  
and grizzly, brown and black  
bear; and Yukon Territory and  
Alaska, practically the same  
as British Columbia.

An indication of the increased  
interest in hunting this year has  
been given by the number of ap-  
plications coming to the general  
tourist offices in Windsor Station,  
Montreal, for copies of the two  
hunting booklets, "Open Seasons  
for Hunting" and "Fishing Wa-  
ters and Game Haunts."

Tom: "Was it a case of love at first  
sight?"

Dick: "No, second sight. The first  
time he saw her, he didn't know she  
had money."

Mountain Guide: "Be careful not to  
fall here. It's dangerous. But if you  
do fall, remember to look to the left;  
you get a wonderful view in this di-  
rection."

A man told a friend that he was  
running for an undertaker as his wife  
was seriously ill.  
"But," remonstrated the friend, "it's  
not an undertaker you want, it's a  
doctor."

"No, no," was the reply, "I cannot  
afford to deal with middlemen."

Personalography

Mrs. Alex Sutherland of Michichil  
arrived in Carbon last Thursday and  
visited for a few days with Mr. and  
Mrs. Ross Thorburn. She returned to  
her home in Michichil on Sunday.

Mr. John Brown of Mt. Vernon  
school, spent the week end in town  
visiting at the Manse.

Wilfred Rogers has left for Rimby  
to spend the winter in the woods.  
Move over Mr. Bear and let me in.

Today, Thursday, is Armistice Day  
and all places of business are closed,  
including the local elevators.

Mr. and Mrs. Eddie Griffiths and  
Mr. Stan Gallow of Rockyford were  
Sunday visitors at the home of Mr.  
and Mrs. Otto Schielke.

The Ardlebank school dance has  
now been postponed indefinitely.

Percy Edwards has purchased a  
1928 Nash sedan, to replace his old  
car damaged in an accident this summer.

A number of Carbon people attend-  
ed the meeting conducted by the Hon.  
E.C. Manning at Rockyford on Tues-  
day.

Harry Irwin, Carbon old timer, died  
on Tuesday night, according to a re-  
port reaching the Chronicle office at  
press time.

The Carbon Old Timers' Associa-  
tion will hold their annual banquet  
and dance in the Farmers Exchange  
Hall, Carbon, on Wednesday, Novem-  
ber 21th. Watch for posters announc-  
ing further details.

The first real snow of the season  
fell on Tuesday night and about an  
inch of the wintry mantle covered the  
ground Wednesday morning. Cloudy  
weather still prevails, although the  
snow is rapidly disappearing.

The Mortimer Sale at the Livestock  
Barn in Carbon on Saturday attract-  
ed a large crowd, although prices were  
not of the high standard as set by  
the previous sale of Jas. Phillips.

Have you something to sell or trade?  
Try a "Classified" in The Chronicle.  
The cost is small compared to the re-  
sults obtained.

## TRAVEL BY BUS—LOWER FARES

According to word from Pence Riv-  
er, a son was born to Mr. and Mrs.  
R.H. Purdy on October 15th.

Mrs. M. J. Elliott spent a few days  
in Calgary this week, going in on Sun-  
day.

D. G. Murray and Corrie Friesen  
returned from Creston on Friday eve-  
ning, with a carload of B.C. apples.

Ray Davidson of Three Hills was a  
Carbon visitor on Thursday.

Mr. and Mrs. H. C. Willson and  
Bobby were Calgary visitors last  
Thursday.

Mr. T.H. Ritchie attended the teach-  
ers' convention in Calgary last week  
and high school pupils were relieved  
of painful duties on Thursday and  
Friday.

Mrs. C.H. Smith was a Calgary vis-  
itor last Thursday.

Mr. and Mrs. B.C. Downey and Lo-  
raine, and Elaine Torrance were Drum-  
heller visitors on Saturday.

Mrs. Hoy left on Sunday for North  
Dakota, after spending a week visit-  
ing in town with friends.

The dance held in the Hosketh husk  
last Friday under the auspices of the  
Hosketh Boy Scouts was a successful  
event and we are informed that the  
boys cleared around \$24.

Wedding bells will soon be ringing  
in the Hosketh district, according to  
a correspondent. A new dwelling is  
being erected near the old Bingham  
house.

EDMONTON—First appearance of  
organizers connected with the Com-  
mittee for Industrial Organization is  
reported in Alberta. Branches of the  
International Workers of America  
are being organized among timber  
workers in districts in the northwest  
and southeast of Edmonton. Local  
people are wondering if Messrs. Rogers,  
Sherry and McNulty have met up  
with the G-Men yet.

And now all the work entailed in  
setting the type for this column can  
only be looked upon as being appreci-  
ated by the editor, on a cash con-  
sideration. Have you paid your sub-  
scription arrears?
